CAPELLA - THE BRIGHTEST STAR IN MULTIHULL CRUISING

There are many fine yachts with years of refinement behind them. There is, however, only one fine *multihull* yacht in that group, and that is Capella. After 11 years and 70 boats of steady improvement, Capella – like the star she is named for – shines out as the best built, best realized cruising multihull available today.

Designed and built to reward the ambitious cruiser, Capella will make you feel at home for a quick trip or a

significant voyage. From its secure cockpit, you can handle all lines while protected from the sun or rain by the hardtop. If you feel the urge to explore ashore, your dinghy is conveniently at hand on davits.

You won't think of Capella's saloon as "below" – not with its panoramic view of the world around you – but here you'll enjoy a spacious eight-seat dining table, served by a galley designed for a crew that understands the relationship between

good cooking and a successful cruise. There are no compromises at night, either, with two equal staterooms with true double beds. Our one-piece head with shower stall has been noted as one of the best designed, most easily maintained heads built today.

Come see and sail Capella. Compare her amenities with the fine yachts of your experience. Once you've sighted Capella, we know this star will shine on through all your future cruises.

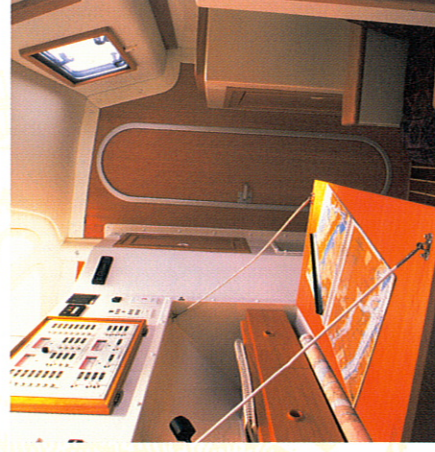

SALOON

Eight can dine around a table surrounded by portlights. Drinks stowage or a convertible bed are options.

HEAD

Large and well-ventilated, Capella's head with its enclosed shower is easy to keep clean.

NAVIGATION AREA

A comprehensive electrical panel and electronics share space above a well-sized chart table.

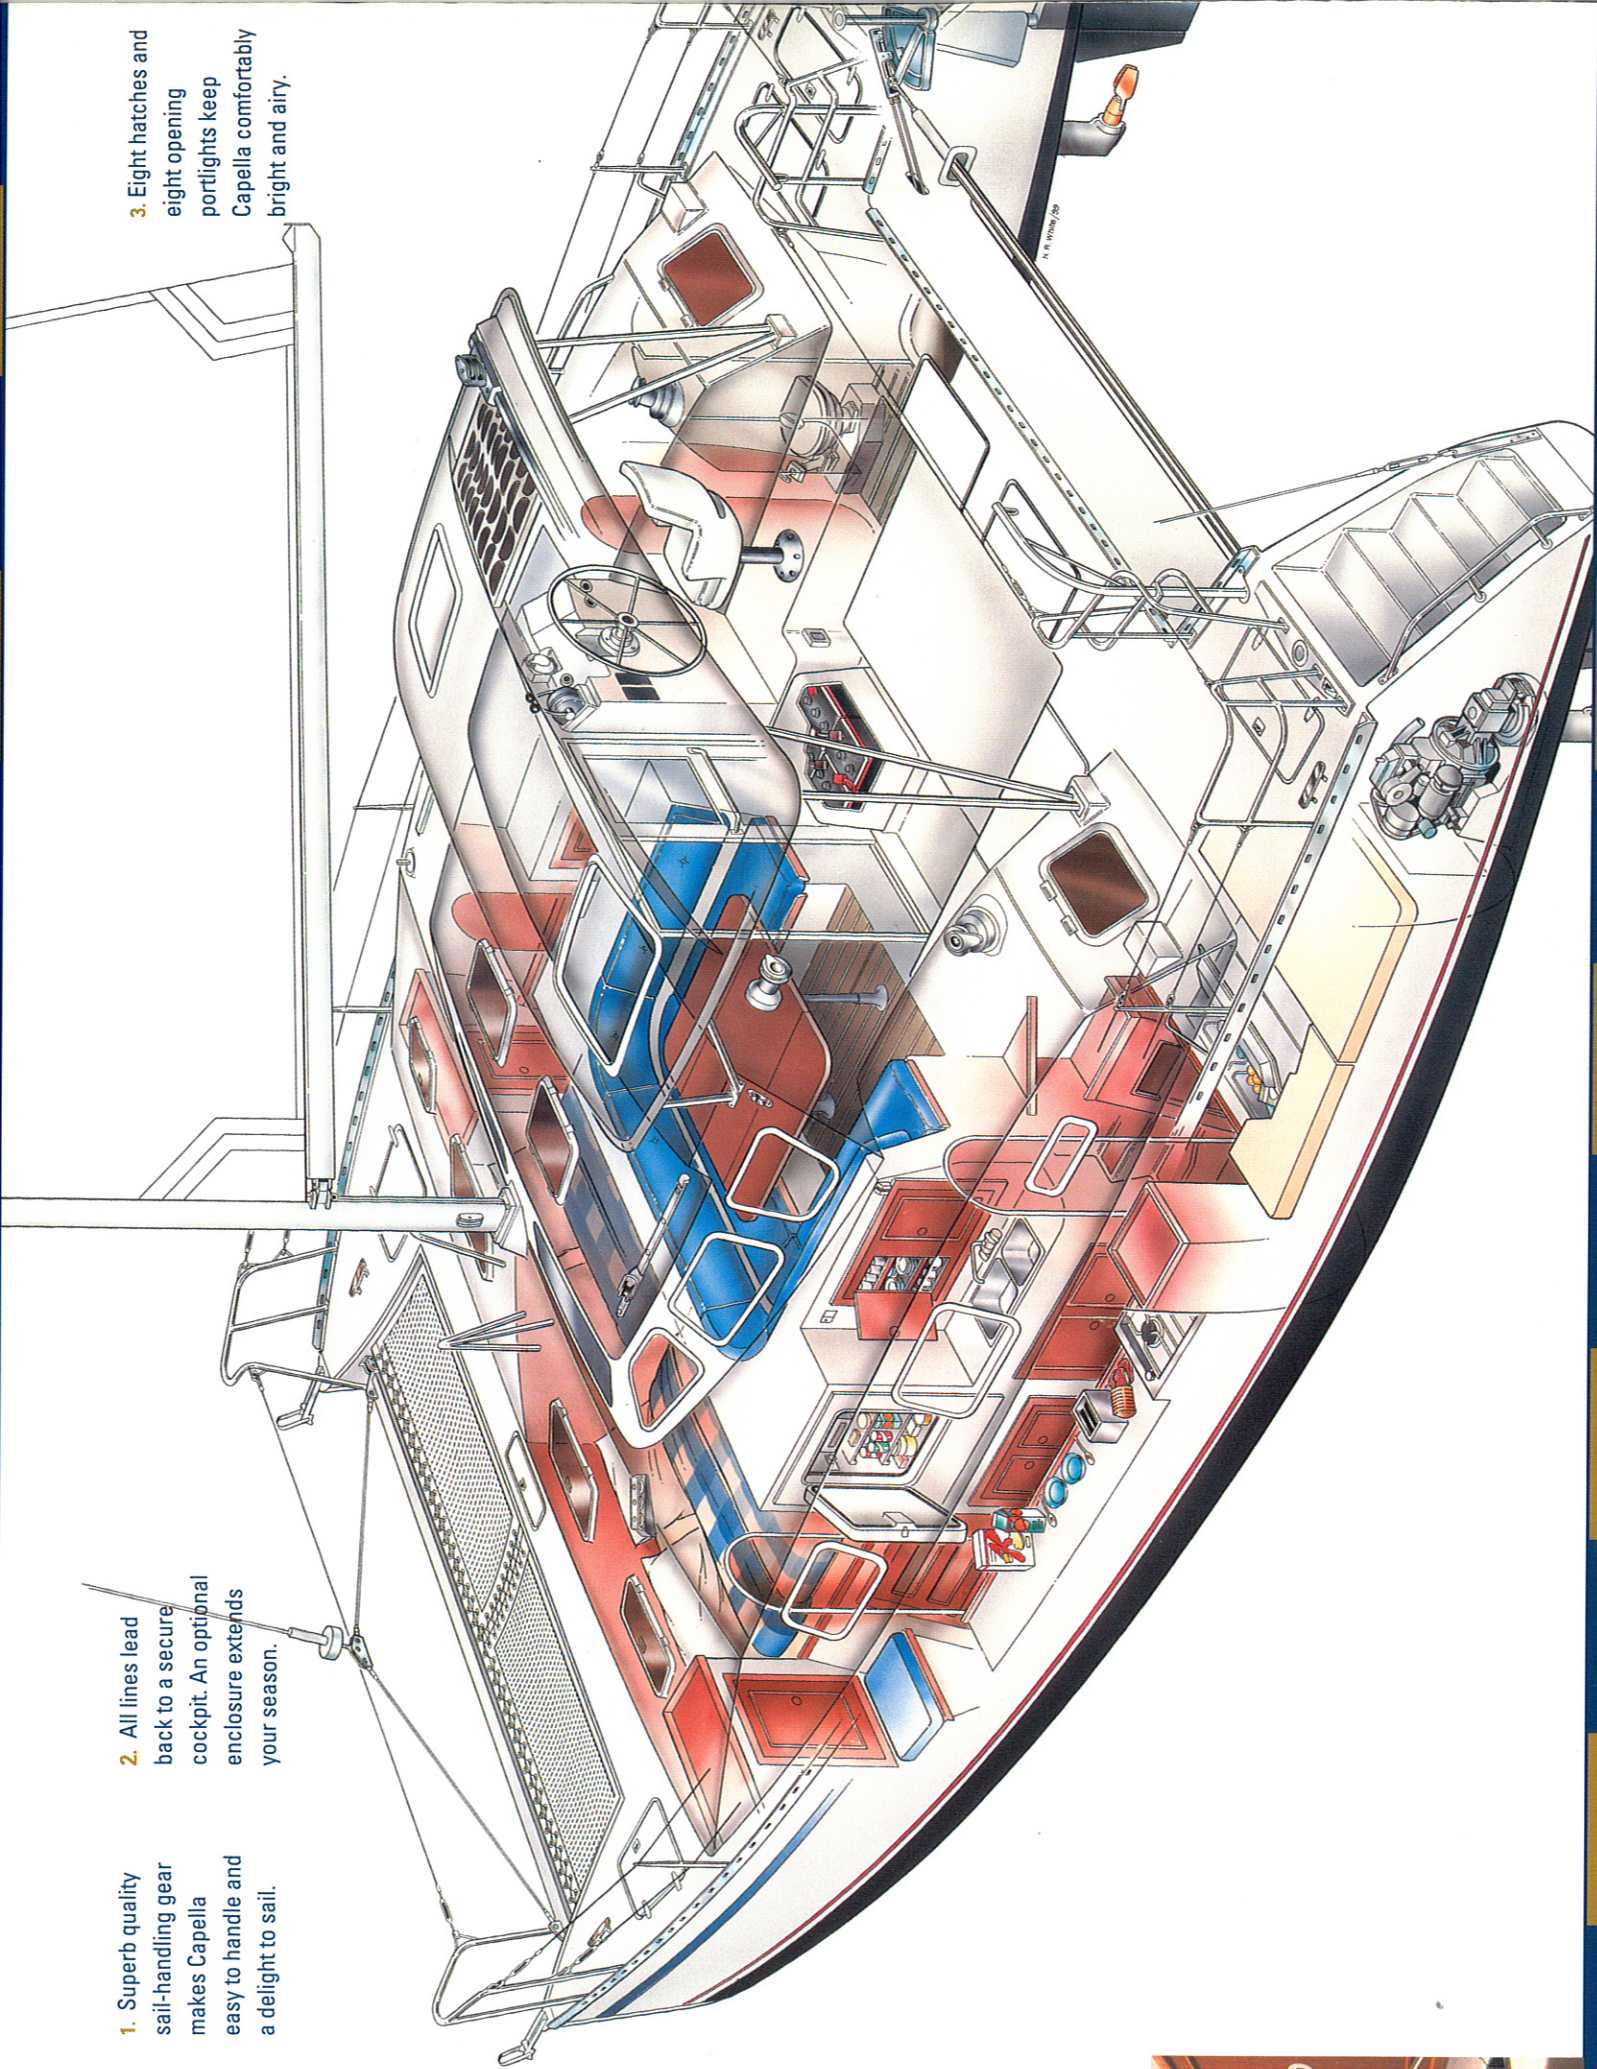

GALLEY

Capella's galley is designed for pleasurable cooking, with range, double sinks and an efficient icebox.

1. Superb quality sail-handling gear makes Capella easy to handle and a delight to sail.

2. All lines lead back to a secure cockpit. An optional enclosure extends your season.

3. Eight hatches and eight opening portlights keep Capella comfortably bright and airy.

4. Shoal keels are built to withstand a grounding with no threat to hull integrity.

5. Carefully engineered mechanical and electrical systems assure comfort and safety.

6. Built to perform, built to last with high strength materials by world-class boatbuilders.

7. Choose your aft cabin – stowage, a second head, a freezer or even a diver's den.

PDQ Capella Classic

The sporty Capella Classic features a secure and comfortable cockpit, protected from sun and rain by a hardtop. Capella Classic's accommodation gains a warm glow from the rich colour and grain of cherry panelling and accents. Power comes from lightweight, powerful 4-stroke outboards.

Powerful steering gear and modest line loads let either of you manage Capella with confidence.

Strong, safe and comfortable, Capella lets you relax and enjoy the pleasure of cruising.

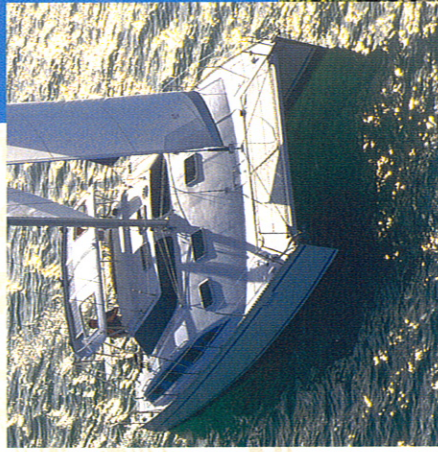

PDQ Capella LRC

The LRC (Long Range Cruiser) gives the ambitious cruiser added power and security for cruising far from home. The LRC includes twin diesel saildrives, skeg protection for the rudders and a number of small but welcome additions to safety and security on deck and below.

PDQ CAPELLA

One of the finest vessels built today in safety, comfort and value for your investment, Capella will reward you with pleasure-filled voyages, with accommodations you'll be proud to share with your guests and with the sheer joy of sailing a fine yacht.

PERFORMANCE

DEPENDABILITY

QUALITY

PDQ Builds Confidence

A yacht should take you away from your cares, not add to them. Capella offers you reliability, longevity and above all, safety, from concept to construction. We believe a good cruising yacht for a couple should deliver performance that makes the most of your cruising time, yet be sailable by either of you alone. By designing Capella with clean, easily driven forms, we made her quick, while keeping sails to manageable

sizes. We kept her trim through professional engineering. There are no "fudge factors", just carefully calculated *safety* factors, dependably realized in high-strength nineties-generation materials by means of high-reliability processes like vacuum bagging. Capella's inherent safety is reinforced by features like watertight bulkheads and sacrificial keels to give you a yacht to expand your confidence and your horizons.

Capella sails without heeling, so cruises are more comfortable and more relaxing. There's room aboard for all your clothes and cruising gear.

Under sail or power, Capella moves quickly and easily. Good sailing manners will expand your confidence and your cruising ambitions.
